

11 March 1974

MEMORANDUM FOR THE RECORD

SUBJECT: Meeting on OJCS Inventory Control System (ICS)

The undersigned met with [] of OJCS on 7 March 1974 to discuss whether all or part of OC's property management information objectives could be served by the Agency-wide inventory control program. [] indicated that ICS encompasses only property in warehouse inventory. OC's property management information requirement involves only "property in use." It was therefore agreed that the ICS program could not meet OC's property management information objectives. [] further indicated that OJCS personnel handling the ICS would not be available for work on other than ICS requirements for at least the next 18 months.
